

2008 edition City of Seattle Standard Plans for Municipal Construction

PREFACE

The 2008 edition City of Seattle Standard Plans for Municipal Construction (henceforth referred to as the “2008 Standard Plans”) have been prepared by Seattle Public Utilities in cooperation with Seattle Department of Transportation, Seattle Parks and Recreation, Department of Executive Administration, Seattle City Light, Seattle Center, and Fleets and Facilities.

The 2008 Standard Plans apply whenever any public or private construction is performed within the Rights-of-Way of the City of Seattle including work performed by private parties at their own expense under authority granted by ordinance of the City Council or by permit of the SDOT Street Use section. The 2008 Standard Plans are designed to be used in conjunction with the 2008 Standard Specifications for Road, Bridge and Municipal Construction (henceforth referred to as the “2008 Standard Specifications”). Each individual 2008 Standard Plan has a reference to the applicable 2008 Standard Specifications section(s) located in the bottom left corner.

For the convenience of our users, 2008 Standard Plans that are new or have been revised from the 2005 edition Standard Plans are identified in the Table of Contents with a vertical bar along the left page margin, as well as bold type. Also, a revision date is located in the upper right corner of each individual Standard Plan to alert the reader to a Standard Plan that is new or has been recently revised.

Despite considerable efforts to produce 1) a completely error-free document, 2) a document consistent with the 2008 Standard Specifications, and 3) a web version of this document, some mistakes and inconsistencies seem to defy detection until after publication. Should you discover errors in this document or inconsistencies between or among the versions, please bring them to our attention by contacting the City’s Construction Standards Engineer at the following web address: http://www.seattle.gov/util/Engineering/Standard_Plans_&_Specs

Should conflict be discovered between this hard copy version of the 2008 Standard Plans and any other version of the 2008 Standard Plans, this hard copy shall take precedence. Should conflict be discovered between any version of the 2008 Standard Plans and the hard copy of the 2008 Standard Specifications, the hard copy of the 2008 Standard Specifications shall take precedence.

My sincere thanks and appreciation to all those individuals in the many City Departments who participated in the effort of providing input, discussing, and reviewing this document, and to the many City Departments for agreeing on standardizing similar constructions. Additional thanks to Dean Huber of the Seattle Public Utilities Technical Resources section and his staff for drafting the individual 2008 Standard Plans and to the Seattle Public Utilities Information Technology section for preparing the web version of the 2008 Standard Plans.

The hardcopy version of this document is available at the Seattle Public Utilities Engineering Records Center located in the Seattle Municipal Tower, 700 Fifth Avenue, Suite 4700, Seattle, Washington 98104, 206-684-5132. The web version of the 2008 Standard Plans can be viewed and downloaded in pdf format at the web address listed above.

This Preface is for informational purposes only and is not to be used to interpret or affect the terms of the Contract between The City of Seattle as the Contracting Agency and the Contractor.
